Coleman Defeated in Final Game of Mutz Cup Last Saturday

Bellevue Defeats Coleman 2-0 in the Final Game for the Mutz Cup

The final for the Mutz Cup was played in Blairmore on Saturday between Coleman and Bellevue. Bellevue emerged victorious, the score being 2-0.

From the face-off the Coleman team started to press and the ball was continually deep in Bellevue territory. After the first few minutes' play Joyce booted the ball through but it was called back for off-side.

Coleman continued to have the best of the play till the middle of the first half, when Rhodes, the Bellevue outside left, took the ball down his wing and put a lovely cross to Dawson, the centre half, who headed nicely into the corner of the Coleman goal, giving Ford no chance.

With one goal down Coleman attacked with vigor but their finish around goal was rather weak and Stuart, the Bellevue goalie, in clearing the half time score stood Bellevue 1, Coleman 0.

The second half opened with more equal play and dangerous advances were seen on both sides. Bellevue's second goal resulted from a nice combination play among the Bellevue forwards. Rhodes, who seemed to be off side, received the ball and carried it goalwards. When tackled he passed to Cole who was standing undefended in front of the goal, and he made no mistake.

After this setback Coleman re-arranged their forward line but it proved to be of no avail. Five minutes before time the rain came down in torrents, drenching the players and making the spectators run for shelter, the final score ending 2-0 in favor of Bellevue. Coleman lineup: Ford, Balloch, Stuart, Griffiths, Parks, Lloyd, Anderson, Joyce, Anderson, Feroan.

CYMRADONION SOCIETY NOTES

The Cymradonion Society held their regular monthly meeting in the K. P. Hall on Friday, Sept. 8. At the business part of the meeting future events to take place were discussed promising a full season for the local Welsh people. Following this a short program was held. Solos were rendered by Mrs. W. Williams, Messrs. W. Lewis, Bert Garrett and Alf Phillips, while little Mary Hopkins gave a spirited recitation. These items were interspersed by communal singing. Then followed a short play in which Mrs. W. Williams, Mr. E. Jones and Mr. Lewis displayed their theatrical skill.

After a delightful supper the rest of the evening was spent in dancing to music played by Mason's orchestra.

POLISH BAZAAR AND DANCE SUCCESSFUL

Many attended the bazaar and dance held in the Polish Hall on Monday, Sept. 4th. At midnight the prize winners were announced, first prize, a gold watch, going to J. Yagos, holder of ticket number 411, second prize, a rocking chair, was won by R. Yuraso with ticket number 58, and third prize a gold Polish emblem ring went to Gus Severin holder of ticket number 28.

SUCCESSFUL SALE ALBERTA BONDS

Strong evidence of Alberta's high standing in the money markets was provided during the past week, when an issue of \$1,000,000 was purchased by the eastern syndicate at a price of 93.7, the highest price recorded this year for any western province. The cost basis to the province is 5 1/2% per cent. The sale marks the first outright sale of bonds yet effected by any of the western provinces, the general custom being for bond houses to agree to handle bond issues for the province at a certain price. The price compares with the cost of 6.27 for a Manitoba issue, earlier this year and for 6.07 per cent for Saskatchewan bonds. A recent issue by B.C. cost that government \$6.7.

500 sheets White Bond Typewriter Paper, size 8 1/2 x 11, in cardboard box for \$1.30 at The Journal office. Useful for manuscript purposes or for writing personal letters.

Where The High Country Calls

Adventure has found a splendid and thrilling outlet in the new order of the outdoors, the Sky Line Hikers of the Canadian Rockies. Organized at Banff and Lake Louise this season, the new order provided such happy, healthful opportunities for hiking over the high passes, Alpine Meadows, and mountain trails of the National Parks of Canada, that devotees of the outdoors throughout Canada and the United States are now slinging its praises. The inaugural hike this year took a large party of enthusiasts, under the expert direction of Swiss Guides Ernest Puez and Rudolf Aemmer, through Paradise Valley, over the high trail past Lake Annette, and over Sentinel Pass to Moraine Lake. The second day's journey took the hikers across the magnificent Wenckemanna Glacier, and through the flower-decked Wenckemanna Meadows, and finally over the snow-bound pass of that name to Eagle's Eyrie on Tokum Creek. The third day saw the conquest of Opabin Pass,

some tricky work on the glaciers and finally the Lake O'Hara-Huntaway Camp. Hikes in the O'Hara country and the Pow Wow country took the fourth day, and the eighth mile hike to Wapta ended this truly historic expedition. Nor is the President of the new order, which is now in full swing with steady increasing membership. A four-day hike in the Yoho Valley will be one of the major activities next summer.

The picture lay-out well illustrates the happy moments on the trail. Carl Rundus, international famous artist, is seen extolling the virtues of the Alpenstock to Miss Georgia Engelhard, celebrated mountain climber and New York socialite. A group of the hikers triumphant on Sentinel Pass enjoying the splendid view down in the mountain valleys below. The first annual Pow-Wow and the Sun-Dee Lodge.

Thrills in Railroadng

For thrills in scenic railroadng the Coquihalla Pass section of the Kettle Valley line in B. C. holds the attraction of travellers. It is indeed a triumph of engineering skill and a tribute to man's determination to overcome Nature's obstacles to provide those facilities for travel for which the Canadian Pacific Railway is famed not only in Canada but throughout the world.

The Crow's Nest section west of the station and around the ledge approaching the loop to McGillivray station is in itself quite a difficult piece of work, as also is the 860 foot climb in eight miles of the railroad from Grand Forks to the "ghost" town of Greenwood, once prosperous lumbering town. From an altitude of 1200 feet above sea level at Grand Forks, it steadily climbs to 3097, at Eholt; almost 1400 feet in 12 miles. With never a falter the puffing locomotive hauls its train of coaches or string of freight cars, winding around acute curves in a manner similar to a snake progressing over the ground.

But the Coquihalla Pass, especially if seen in the grey dawn, gives the most direct thrill of this southern route to Vancouver. Jagged peaks rise 1000 feet above the narrow ledge which has been hewn out of the rock face and one's thoughts often cause him to shudder as the train proceeds slowly on its narrow roadbed, bridged at frequent intervals across deep gullies where it was impossible to make a ledge or detour around the gully or canyon. It looks hazardous in the summer time, and frequent stretches are protected against slides of earth and snow by very strongly built sheds, requiring the use of heavy timbers firmly built into the rock. For a period of the winter months the Coquihalla Pass is not used, the risks of derailment through slides making this precaution imperative, yet there are travellers who raise objections because another route occupies three hours longer in reaching their destination. But as one railroad man said: "What is three hours compared to the loss of lives and the wrecking of a train?"

The building of a railroad through such a sea of mountains was a colossal task. Every time one goes over the road he cannot help but think of those really big men who foresaw the winter months the Canadian railroad meant from a national standpoint. Against public opinion and staggering financial difficulties, they tackled a titanic task, and such achievement is a permanent monument to such men as Lord Mount Stephen, Lord Sloughnessy, Sir Wm. Van Horne and others whose indomitable will and driving power gave to Canada a railroad which not only

provided a link from the Atlantic to the Pacific on all Canadian soil, but opened up to world travellers as well as our own people scenes of grandeur which are unsurpassed throughout the world.—H. T. H.

UNITED CHURCH NOTES

Continuing the series on mountain scenes from the Bible, the minister will take as his theme: "A Mountain of Temptation." The Junior Choir will sing.

Sunday school at 12:15. Do not forget the 11:00 day service, Sunday Sept. 24th, 11:00 a.m. This is parents over last year. The largest catch was of 555.91 pelts of muskrat, 316.333 squirrel pelts and 267.461 ermine pelts. There were also taken 11,553 silver fox pelts, 9,279 beaver pelts, 7,310 red fox pelts, 2,979 beaver pelts, 11,640 prairie wolf pelts, and 100 timber wolf pelts.

The sermon-subject for the evening worship will be "The Greatest Gift in the World." Come and worship with us. You will be made welcome.

ST. ALBAN'S CHURCH, COLEMAN

Next Sunday is the 14th after Trinity, services will be: 11:15 a.m., Holy Communion and Sermon. 12:30 p.m., Sunday School. Rev. P. C. Wade, Rector of St. Augustine's, Lethbridge, will be in charge of the service. 7:30 p.m., Harvest Festival at Blairmore.

Town of Coleman

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Town of Coleman will offer for sale by public auction on Friday, the 20th day of October, 1933, at 10 o'clock in the forenoon, at the Town Hall in Coleman, Alberta, the following lands:

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificates of title. Terms, cash. Redemption may be effected at any time prior to the sale by payment of all arrears and costs. Dated at Coleman, Alberta, this 14th day of September, 1933. JAMES FORD, Secretary-Treasurer.

COLEMAN ENTRIES WIN PRIZES AT BELLEVUE SHOW

Coleman carried away its share of the honors at the Bellevue Exhibition again this year. W. J. Harris, whose many varieties of flowers have always been prize-winners, this year was awarded nine prizes, one of which was a dahlia, 10 inches in diameter. His sweet peas were given high praise by the judges.

G. Reid who had nine entries in poultry, won 5 firsts, 3 seconds, and 1 third. In addition to these he was awarded a special prize for the best hen in the show.

L. Fauville, who has always been outstanding as prize winner in vegetable entries, this year won 18 prizes in all, 6 firsts, 6 seconds and 6 thirds.

BOWLING NOTES

At the bowling alley this week Dr. Howe of Fernie made a score of 234 in ten pins and H. Zak made 336, the highest score in five pins.

LOCAL AND GENERAL

Mrs. J. Haining of Turner Valley is visiting friends in town.

"Billy" Carr recently returned from Vancouver where he spent two weeks visiting relatives.

Miss Linda DeCocco left on Sept. 3 for Edmonton to enter as a nurse-in-training at the Royal Alexandra Hospital.

Mrs. Russel Ewing and children returned last week from a three months visit to Scotland. Mr. Ewing met them at Winnipeg where they spent a few days before returning to Coleman.

Miss A. Yuill accompanied the Girl Guides on an enjoyable hike to Star Creek falls on Saturday. Fire-lighting and various other tests were passed by the girls. It is of interest to note that Miss Yuill has been granted her captain's warrant.

Catholic Whist Drives

The Catholic Ladies Aid will commence their series of Whist Drives next Thursday evening, September 21st, in the Catholic hall. Lunch will be served. Admission 35c. They wish to thank all those who patronized these whist drives last season, and hope for their patronage again this season.

Keen Boxing Program to be Staged in the Coleman Arena

Comments on the Boxing Card for September 23rd in Coleman Arena.

Coleman is reported to be the boxing centre of Alberta due to the number of matches staged here within the last few weeks. On Sept. 23rd in the ten round main with Duke Hyslop vs Murdo Morrison we can expect a regular battle. This is a return engagement.

In the six-round semi-final, Angus Morrison, who you have seen in action and therefore know what to expect, will oppose Johnny Campbell, a Lethbridge boy. Through the Lethbridge Herald he challenged the winner of the fight between Morrison and Burrill. He was on a card in Milk River last week and won. He is a good scrapper and a contender for the lightweight champion of Alberta.

There will be a special event of six rounds with Jimmy Stanmore of Lethbridge against Mickey Stewart of Marysville, B.C. Stanmore was amateur champion of Alberta until he went pro. Burrill put a lucky one over on him two months ago and Jimmy is anxious to redeem himself.

Mickey Stewart is one of Tod Morgan's Spokane scrappers. He claims one win over Angus Morrison, one draw and one in which he lost the decision on points. His desire is to Angus in a ten round bout in a Coleman ring, and is promised this chance if he makes good on the 23rd.

Add a battle royal to the above card and it looks like a big night in Coleman on the 23rd.

LOCAL AND GENERAL

The band concert that was to have been held at the rink last Sunday was postponed on account of rain.

Mr. Dau Morrison returned on Tuesday after spending a month at Banff, Kimberley, Midlandvale and various other points.

Mr. D. Davis, formerly employed by the International Coal and Coke Co. Ltd. and Mrs. Davis and daughter are visiting at the home of Mr. and Mrs. 1 Fred Cox.

The World Wheat Situation

People who had the privilege of listening to Premier Bennett's speech before the members of the Montreal Board of Trade at the banquet tendered to him on his return from attending the World's Economic Conference, and the Wheat Conference of the leading wheat exporting and importing countries which followed the larger world gathering, undoubtedly learned many things about world matters, and especially wheat, which were entirely new to them and must have impressed them with the magnitude of the problem which now confronts Canada in disposing of its chief article of export—wheat.

Prior to the Great War, Canada was rapidly forging ahead to first place among the wheat exporting nations of the world. Gradually the United States, which had been the great exporter, was relinquishing her position as a wheat exporter and more and more rapidly approaching the stronger economic position where her production of wheat would not be more than sufficient to meet her own domestic requirements. In fact, it was confidently stated by persons in authority that in a few years the United States would be a wheat-importing rather than a wheat-exporting nation.

Canada, Australia and the Argentine found their markets in Great Britain and the principal countries of continental Europe, France, Germany, Italy, Spain, Holland, Belgium, all of which countries took large quantities of imported wheat either directly from the country of origin, or indirectly through the London and Liverpool markets. Then came the Great War. Wheat was in greater demand than ever. Europe was willing to pay almost any price to get it. To meet the demand of the Allied nations it was urged as a patriotic duty upon the people of Canada, equal almost to enlisting in the army, to raise wheat and more wheat. Greater production of food-stuffs was the slogan, and the most intensive organization was directed to bringing about that larger production. The United States again turned to quota production of wheat because of the prevailing high prices and unlimited market.

It was taught the nations of Europe the lesson of the importance of being able to feed their people in times of war or other emergency. Germany learned the lesson. Italy learned it. France learned it, and while not directly involved in the war, Spain learned it through the high price she had to pay for wheat and other imported food commodities.

For a time after the war, while the necessary work of reconstruction of their countryside and industrial towns and cities was under way, the countries of Europe still offered a good market for imported wheat and at a high price. But the governments of these countries organized to raise more wheat, meet their own requirements and thus safeguard themselves against starvation on the one hand, or the possibility of being required to pay excessively high prices on the other hand in the event of a further war or world emergency. They offered bonuses to their farmers to produce wheat, they fixed uneconomic high price for domestic grown wheat, they imposed prohibitive tariffs on imported wheat, they arbitrarily governed all importations, and fixed minimum quantities of imported wheat that might be used by millers and in the making of bread.

Premier Bennett outlined the effect of these things in his speech. The four great wheat exporting nations are Canada, Argentina, Australia and the United States, the chief of which is Canada, while the great wheat importing nations are generally listed as Great Britain, France, Germany, Italy, Spain. But, Premier Bennett pointed out, whereas European countries in 1930 produced approximately 600,000,000 bushels of wheat, in 1933, just three years later, they produced 1,220,000,000 bushels, an increase of 350,000,000 bushels.

Even more illuminating was Premier Bennett's statement that this year France will produce between 75,000,000 and 100,000,000 more bushels of wheat than Canada; Italy will produce 75,000,000 bushels more than Canada; Germany and Spain combined will produce 125,000,000 bushels more than Canada. These countries were the former buyers of our Canadian wheat; now they are producing more than Canada.

Mr. F. E. Murphy, who was the United States Government delegate to the wheat conference in London, gives the wheat production of these four European countries this year as 1,015,000,000 bushels, against Canada's estimated crop of 300,000,000 bushels, Argentina's 220,000,000 bushels, Australia's 174,000,000 bushels, and United States 499,000,000 bushels. In other words, these four European countries will produce almost as much wheat this year as the four chief exporting nations. In addition, the Danubian countries, Hungary, Roumania, Yugoslavia and Bulgaria, will produce in the neighborhood of 327,000,000 bushels. Russia is steadily increasing her wheat production and, while unquestionably her own people need it, the Soviet authorities nevertheless export large quantities in order to finance necessary purchases abroad.

In the face of this situation, brought about, so Premier Bennett declared, by a condition of things expressed in one little four-letter word, Fear—fear of starvation in the event of another war which contingency is still hanging over Europe, and fear of ransom, or, in other words, of being again compelled to pay excessively high prices for imported wheat in order to stave off starvation, the World wheat conference entered into an agreement which provides on the one hand for a limitation of exports of wheat from the chief exporting nations and a reduction in the acreage sown to wheat by the four largest exporters of wheat, and, on the other hand, for no further increase in production by European countries, except Russia, for a removal or some of the restrictions now imposed by European countries designed to reduce the consumption of wheat by the use of substitutes, and for an eventual reduction in the tariffs now imposed on imported wheat when the price reaches a certain stipulated figure.

Admittedly this agreement is in the nature of an experiment. Whether it will prove practical in actual operation remains to be seen, because there are many factors which enter into the calculation entirely beyond the control of man. However, the facts and figures here presented are undoubtedly of vital interest to the people of Western Canada and provide much food for serious thinking and planning on their part.

"I seem to know you. Did I once and you money?"
"Did you get it back?"
"Yes."
"Then you don't know me."

Like America, Australia had no cattle until European explorers came there.

Paris plans to build many schools.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized, at any time, with diarrhoea, dysentery, summer complaint, or other forms of bowel trouble. There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry. It is a remedy that has received the endorsement of legions of Canadian mothers during the 88 years it has been on the market. Don't experiment. Get Dr. Fowler's and be on the safe side. Manufactured only by The T. Millum Co., Ltd., Toronto, Ont.

Progress in New Gold Fields

Large Amount of Work Done on Labrador Claims
Remarkable progress has been made already in the Labrador gold-fields, according to Hon. W. J. Walsh, Newfoundland's Minister of Agriculture and Mines, who has returned to St. Johns from the Lake Wabush district.

He was accompanied on the expedition by Dr. O. K. Snelgrove, geologist, and J. W. Foote, mining engineer. All three seemed enthusiastic about the future of Labrador.

They reported that of the 22 concessions granted by the Newfoundland government since the Labrador was opened to prospectors last fall, nearly one-half are being actively investigated by field parties. The Lake Wabush camp, which is reached after a 200-mile aeroplane trip from Seven Islands, Quebec, had a population of 39 when they left.

Mr. Walsh and his party spent a week in the interior. They said flies were unusually scarce. Unsettled weather conditions had interfered somewhat with the work of the field parties but despite this a remarkable amount of work had been accomplished.

ASHAMED OF HER FIGURE

Husband Persuaded Her To Take Kruschen

By following her husband's advice, this woman made a tremendous improvement in her appearance—she actually lost of 32 lbs. of her excess fat. Telling of her experience, she writes:

"A year ago I was troubled with rheumatism, nervousness and other complaints. And I got so fat that I was ashamed of my own figure. I was persuaded by my husband to take Kruschen Salts. Before I began, I weighed 163 lbs. After taking Kruschen for a short time the rheumatism was less painful, my nerves got stronger, and my sight lighter. Then I knew that Kruschen was doing me good, so I persevered with it and got my weight down to 129 lbs, a reduction of 32 lbs. of unwanted fat. I am not boasting when I say that I feel younger and more active, have a much better figure and am healthier than I have been for years." (Mrs.) J. S.

Kruschen is a blend of six mineral salts which the body's internal organs to throw off each day those waste products that would otherwise accumulate in the form of fatty tissue.

Founded Centuries Ago

History Of Bavarian City Dates Back For 1,700 Years

In this year of centuries, tricenarian and bicentenaries all over the world, the Bavarian boosters of Weissenburg are inviting all and sundry to celebrate with them the 1,700th anniversary of their city's founding. It was back in 233 that the hardy local tribesmen first broke through the fortified military road built by the Romans, destroyed the citadel of Bricianus and built with its stones a castle called the Winiburg. Fragments of the city were erected at that time, with 31 towers and a number of big gates, still remain. The Ellinger gate, in particular, is considered one of the finest medieval structures of its kind in all Germany.

Miniature Paintings

Microscope Needed To See Fine Work Of English Artist

Painter of miniatures so small that 20 of them will fit on a postage stamp, Stanley A. Burchett, of London, formerly of the Grenadier Guards, claims that they are the smallest pictures in the world. Two, about an eighth of a postage stamp in size, have been purchased by the queen. One is a seascape showing a sailing vessel at dawn, and the other a still-life of marigolds in a blue vase. To appreciate the pictures fully it is necessary to use a microscope. And it difficult to believe that the miniatures are real water-colors painted with a brush.

Dentistry In Olden Times

Even the ancient Egyptian had to be told to "open wide" and probably had trouble with his false teeth dropping out occasionally, according to Dr. J. K. Lowry, McGill University specialist in his branch of dental science. He told of dental work done by the Egyptians as early as 3400 B.C., in a talk before a local society. He also described known traces of dentistry among the Greeks, Etruscans and the Romans.

Japanese tea exported during 1932 showed an increase of 4,072,000 pounds over 1931.

More than 250,000 persons are now employed by the British post office department.

It pays to
"Roll Your Own" with
TURRET
FINE CUT
CIGARETTE TOBACCO
SAVE THE POKER HANDS
Imperial Tobacco Company of Canada, Limited

You can obtain a pair of first quality Ladies' pure thread Silk Stockings, 45 gauge. Combined with excellent wearing qualities, these Stockings have the dull, sheer appearance which is so desirable, and they are obtainable in the latest shades. Sizes 8 1/2, 9, 9 1/2, 10.
There is genuine economy in rolling your own with Turret fine cut, as you can make more than 50 cigarettes from a 20c. package.

Prototype Kilogram Valuable

Only About Thirty Standard Measures Are In Existence

A secret mission in the charge of a high official of the London Board of Trade, recently took first, to Paris and then to Seville, the "British prototype kilogram."

This is Britain's official copy of the "international standard kilogram," on which all metric and scientific measures of weight are based. At Seville, which is the home of the international committee of weights and measures, the "British prototype" was compared with the international standard.

These comparisons have been made only once before since 1889. The international and the British kilograms were weighed against each other on a balance sensitive to a hundredth part of a milligram. There are 28,350 milligrams to an ounce.

The prototype is made of a platinum alloy called iridio-platinum. In spite of the high resistance of this metal to external influences the British kilogram could have changed its weight by a few hundredths of a milligram in so few minutes changes occur they are reported to parliament.

Plans for the journey were kept secret lest bandits might attempt to steal the prototype. A kilogram of iridio-platinum is worth several hundred pounds sterling as metal alone, while a "prototype kilogram" is naturally worth far more than its price as metal, for they are only about 30 in existence—one for each of the principal nations.

Military Command Changes

Toronto Officer Goes To Victoria To Take Over Military District

Major-General E. C. Ashton, C.M.G., V.D., district officer commanding military district No. 2, Toronto, is leaving shortly for Victoria where he will take over military district No. 11, which includes the province of British Columbia and the Yukon Territory.

Brig-General T. V. Anderson, D.S.O., district officer commanding military district No. 10, with headquarters at Winnipeg, replaces Major-General Ashton at Toronto, and is understood Brigadier W. B. Bean, D.S.O., whose appointment to command military district No. 11 became effective a short time ago, will go to Winnipeg to succeed Brig-General Anderson.

Long Trip For Biplanes

British Machines To Fly 12,000 Miles Over Africa

Three large British troop-carrying biplanes are detailed to make later this year the longest and most ambitious formation flight yet contemplated over the breadth of the African continent—a journey of 12,000 miles from Cairo in the east to Bathurst and Dakar in the west. Their route goes south as far as Khartum and thence westwards over French Equatorial Africa, Nigeria, the Gold and Ivory Coasts, Sierra Leone, the Gambia and Senegal. They will fly over thousands of square miles of territory which were unexplored less than a generation ago.

France has ruled that motion picture films in foreign languages can be shown in only 15 theatres in the country.

A new high-speed passenger and mail plane in Germany has a speed of 226 miles.

Freight Car Was Elusive

Ex-Sergeant Proved He Did Not Abandon His Post

An ex-sergeant brought an atmosphere of comic relief into the military tribunal at Paris, which is still hearing appeals from war-time court-martial sentences when he successfully appealed against a sentence imposed in 1918 of 15 days' imprisonment for twice abandoning his post.

Sergeant Nigon was ordered to escort a freight car containing 5,000 gas masks. When the convoy stopped for the night he went to sleep, and when he awoke up the box-car had disappeared.

The railway authorities assured him it would come back. It turned up two days later.

He was then told the train would proceed again next morning but when he looked for it again it had disappeared. Eventually he discovered it had arrived at its destination without the loss of a single gas mask.

In reply to questions he said he did not sleep in the box-car because a soldier was only allowed to sleep in a horse car during the war. If he had slept next to it on the track he would have been run over. He did not get inside because if he had done so they would not have been able to shut the door. He declared he did not abandon his post because a post is a fixed point and the box-car was a movable object.

"It was a phantom car," he said. "It kept disappearing."

He was acquitted and the sentence quashed.

Air Permeated With Gas

Carbon Monoxide From Cars Menace To Human Life

Subjected to a "gas-attack" of increasing intensity from automobile exhausts, residents of large cities may some day require the wearing of gas-masks in self-defence," says Sir W. I. DeC. Wheeler, medico-sociologist, who is an honorary fellow of the American College of Surgeons.

Light on the unseen effects of the motor-car upon human life was thrown by Sir William at the meeting of the British Medical Association in Dublin.

Permeation of the atmosphere with gases from autos accounts for an unestimated portion of the annual death rate, he said.

"The blood of traffic policemen has been found to be charged with carbon monoxide at a high concentration, and the blood of those who constantly motor in cities must be similarly polluted."

An Interesting Swap

United States Museums Trade Specimens Of Extinct Birds

The Carnegie Museum now has a great auk and the National Museum at Washington has a cahow—most of a cahow anyway—and therein lies a tale of barter among scientists.

For one moment skeleton of a great auk, the Carnegie Museum gave the National Museum a "practically complete skeleton of a cahow."

Both the great auk and the cahow are—or were—birds, now extinct. The auk, a native of Bermuda familiar to sailors as a puzzle people, was a very cross-wind puzzle people, was a very large bird which moved around at night and buried itself in the sand by day.

The cahow, a pretty large bird too, stayed in the far north.

Tornadoes are the swiftest of winds, travelling as fast as 400 or 500 miles an hour.

Chance Meeting Recalls

Rescue During War

Ship Inspector Meets Sailor He Saved From Torpedoed Vessel

A thrilling rescue in the days when British ships carried on a hazardous trade along routes infested with mines and German "subs" was recalled at Montreal harbor when Captain R. H. Monks, deputy port warden, boarded the steamer "Glan Alpin" the course of an inspection.

Accosted by a member of the crew who asked if he remembered him, Captain Monks found himself unable to recall who the man was. The seaman then proceeded to identify himself as the man whose life the Montreal port official had saved during the Great War when Captain Monks' ship had been torpedoed off the Irish coast.

About to jump into the one remaining lifeboat the ship's master heard groans from some place on the deck. Returning he found a member of the crew, badly wounded. Picking the man up, Captain Monks carried him to the lifeboat only a minute before a terrific explosion sent the ship to the bottom.

After two days on open sea they were picked up by an American destroyer and taken to an Irish port, where the wounded man was given treatment.

Has Radio Wave Pains

Tacoma Dairymen Is Obligated To Ground Himself To Obtain Relief

Scientists have started an investigation into the unique case of Martin Bodker, dairymen in the Tacoma district, who suffers intense pains from radio waves unless he grounds himself.

Tacoma and Seattle specialists have declared they were baffled. Bodker some years ago began to suffer intense pain. Physicians could find nothing wrong with him, but the pains much like rheumatism, persisted from time to time.

One day he put his hands on a water faucet while suffering from the pains, and they immediately vanished. When he took his hand off the faucet the pains returned. Bodker wrapped a cane with copper wire, bored a hole through the floor of his living room, and "grounded" himself.

The case was brought to the attention of Los Angeles physicians by one of Bodker's relatives living there, and Bodker was persuaded to go to that city.

Human Loud Speaker

Official possessor of the toughest lungs in the United Kingdom, W. B. Anglin, town crier of Marlborough, Wiltshire, England, aged 63, won the championship from twelve rivals in the National Town-Criers annual contest at Lyme Regis. The three judges sat in a tent 100 yards from the yelling contestants.

Commodity prices in Belgium are increasing.

Intrepid Balloonists In Gordon Bennett Race Land In Northern Quebec

Riviere a Pierre, Que.—Nearly two days and two nights in the air and six days in a trackless Quebec forest, weary and hungry, Captain Francis Hynes and Lieut. Zigniewski Hynski, Polish competitors in the James Gordon Bennett balloon race have reached here and Sunday were resting after their trying adventures.

The intrepid balloonists who set out with a group of other bags from Chicago September 2, were in the air 39 hours and 30 minutes and travelled on a north easterly course approximately 812 miles, according to their calculation. After passing over the wild country of middle Ontario and Quebec, they descended in a forest at 10:45 P.M. Monday morning, slightly over 100 miles from this little railway junction point which is itself 60 miles northwest of the city of Quebec.

Aided only by their compass with which they pointed a course back to civilization they trudged through the woods until they struck the Canadian National Railway tracks near Lemieux. Section hands then gave them a lift on their hand car for the 12-mile journey to Riviere a Pierre.

The aeronauts ran the gamut of thunder storms on their air journey and suffered from cold, hunger, and fatigue on their difficult hike through the dense woods which separate their landing place and Lemieux. They had only a dozen oranges as food between them and these were gone when they sighted the welcome railroad tracks.

After a good night's rest Captain Hynes and Lieut. Zigniewski pronounced themselves in fairly good shape again. They will rest here until they have completed plans for the recovery of their balloon. It will probably have to be portaged through the woods by Indians or trappers who are the only men who know the locality where it descended.

Jobless Present Demands

Immediate Answer Is Impossible
States Sir George Perley

Ottawa, Ont.—A party of 15 men and women representing 300 delegates to the National Conference of the Unemployed now in session, presented a list of "demands" reforms before the Dominion Government and demanded "an immediate answer."

They were told by Sir George Perley, acting prime minister, that no immediate answer could be given, but their presentations would be received by the cabinet.

A parade of unemployed in front of the parliament buildings lasted nearly half an hour, with police keeping a close watch, but not molesting the demonstrators.

Threaten To Destroy Trees

Kelowna, B.C.—Threats of "amazing" down the trees of those who would not come into an agreement were heard at a meeting of Kelowna fruit growers who asked of the shippers a guarantee of a cent a pound minimum for all apples picked and shipped.

Sees Emergence Of Canada From The Financial Depression

Montreal, Que.—Because, in a general way, Canada's rise to and fall from good times has lagged in point of time behind that of other leading countries, because of the Dominion's power to resist depression, of its efforts to meet the difficult economic situation, of its recuperative ability and of improving world conditions, "the Dominion in the comparatively near future may enter more peaceful waters in which the barques of industry and commerce may again set sail for better times."

This is the conclusion of an exhaustive analysis of Canadian conditions during 1932-33 contained in the report on economic conditions in Canada drafted by F. W. Field, his majesty's senior trade commissioner in Canada and Newfoundland, and made public Thursday, Sept. 7.

Efforts to meet depression may have to be intensified before normalcy returns, says the report. But "two factors that appear likely to pull the Dominion out of the worldwide depression are, firstly, the nation's own efforts—and opinion seems

Canadian Weekly Newspaper Association

Fourteenth Annual Convention Is Held At Vancouver

Vancouver, B.C.—Delegates to the Canadian Weekly Newspaper Association's three-day convention, heard reports, including those of A. W. Marsh, Amherstburg, Ont., president, and Roy Sales, general manager, Renfrew, Ont.

Various reports recorded the difficulties weekly newspapers had weathered and expressed optimism for the future.

The 175 delegates were welcomed by Mayor Louis D. Taylor, "an old newspaperman myself."

While the present is only the 14th annual convention of the present association, President Marsh reminded the delegates their organization had a continuous history of three-quarters of a century.

The president elected will preside next September at the 15th anniversary of the founding of the association out of which the present organization grew. The jubilee is to be held at Kingston, Ont.

May Remove Restrictions

Rumor That Pegged Price On Grain Will Be Rescinded

Winnipeg, Man.—"Rumor is current that the 'peg' will be withdrawn from the wheat market in the near future," states The Winnipeg Free Press in a news page story.

"Officials of the Winnipeg Grain Exchange are silent on the subject but others prominent in the trade believe the price restrictions will be removed at an early date," the paper adds.

Minimum prices for wheat and oats were established August 15 by vote of the exchange membership. The October wheat future was "pegged" at 70½, December, 71½, and May, 76½ cents per bushel, "abnormal conditions surrounding other markets" were given as reason for the action. A vote of the general membership of the exchange will be necessary to reverse the resolution adopted last month.

Loading At Churchill

S.S. Gardania May Be Last Vessel To Take On Cargo This Season
Churchill, Man.—Elevator machinery hummed here with the arrival of the S.S. Gardania to take on what may be the last cargo of grain to be shipped from Manitoba's northern port this season.

With her arrival in port, preparations to loading 230,000 bushels of grain were immediately under way and when the "Gardania" steams out of the harbor the 2,600,000-bushel government elevator will have less than a ship's cargo in store. The leftover will total only 38,000 bushels of wheat. She is the ninth vessel to take an overseas grain cargo from the Hudson Bay port this season.

Great Statesman Passes

Viscount Grey, Of Fallodon, Is Dead At Age Of 71
Christian Bank, England.—Viscount Grey, of Fallodon, former secretary for foreign affairs, and onetime British ambassador to Washington, died Wednesday, September 6.

The veteran statesman had been ill more than a week from a malady, the exact nature of which was not disclosed but was thought to have resulted from high blood pressure.

Death came at 6:05 a.m. The viscount had been in a coma for some days, when he suffered a relapse.

No other man served as long as his majesty's secretary of state for foreign affairs as did Sir Edward Grey—11 years. No other foreign secretary had such a weight of decision thrust upon him. Through all the tense years, fraught with crises that preceded the British declaration of war, August 4, 1914, Sir Edward was undisturbed, but not untroubled; he had the mighty force of British public opinion behind him as few men have had, and he reached his decisions with calm clear strength that commanded the world's respect. He died as Viscount Grey, of Fallodon, but as Sir Edward Grey he will live in history.

Accepts Important Post

Saskatchewan University Professor Goes To Carnegie Institute At Pittsburgh

Saskatoon, Sask.—Dr. Lloyd L. Dineen, professor of mathematics at the University of Saskatchewan, for the past 18 years, and for the past two years administrative head of the junior college there, has accepted the position of head of the Department of Mathematics at the Carnegie Institute of Technology, at Pittsburgh, President W. C. Murray announces. The position carries a greatly increased salary.

Dr. Dineen has long been known as one of the leading mathematicians in Canada and as honored as a fellow of the Royal Society of Canada in recognition of his successful research work. He was highly appreciated here as a teacher and administrator. He received his training at the University of Chicago.

Professor D. B. Delury will continue Dr. Dineen's classes in mathematics during the coming year, Dr. Murray intimated.

Indian Chief Well Known

Head Of Sioux Tribe Dies After Long Illness

Prince Albert.—Chief George Kinewakaw, of Grisiwold, Man., head of the Sioux Indians in Canada for many years, passed away recently at the Round Plain Indian reserve and was buried September 2, according to word reaching here. The 74-year-old Indian chief was visiting Sioux friends in the reserve and he became ill on August 20 after having assisted in a year. He had been suffering for years from an internal ailment.

Chief Kinewakaw was one of the best known Indians in Canada. He was one of the central figures in the colorful Winnipeg Board of Trade celebration in 1920, held in honor of veteran Red River settlers and trail blazers of the Canadian northwest. He was a successful farmer at Grisiwold.

SIDNEY T. SMITH

President of the Winnipeg Grain Exchange, who announced the "pegging" of wheat prices for the first time in the history of the Exchange, said the "peg" would remain until the market is stabilized.

Project Has Been Success

Colonization Of Special Kind Working Well In Quebec

Quebec, Que.—The Grancher system of placing with farmers and their families healthy children from city homes where there are cases of tuberculosis was introduced last year by the Quebec Bureau of Health, and according to Hon. Athanasie David, provincial secretary, the experiment has been successful. "The children have become attached to country life and have no wish to return to the cities, and in a number of cases the farmers have gone to the extent of legally adopting the children. This is a good kind of colonization," said Mr. David, who has been delving into the doings of the provincial bureau of health since his return to work after a few months abroad.

The Grancher system gets its name from the fact Professor Grancher, now deceased, organized this system of family placement 30 years ago at a time when public attention in France was turned to the scourge of tuberculosis. The work still goes on in France but it is done under private initiative on the basis laid down by Professor Grancher, and funds are also provided by private purses. Mr. David studied this system in France and launched the project in Quebec without waiting for private initiative to start the work.

Discuss Disarmament

London, Eng.—General phases of the disarmament problem were discussed at some length by Sir John Simon, Secretary for Foreign Affairs, and Norman H. Davis, United States ambassador-at-large. Sources close to Davis disclosed he anticipates the nations will raise no serious objections to the French plan of supervision of armaments provided it is linked with a real arms reduction agreement.

Have Returned To Ottawa

Ottawa, Ont.—After three months' absence, some of which they spent in western Canada, the Governor-General and Countess of Beasborough have returned to the capital. They were accompanied by their elder son, Lord Duncannon, and their daughter, Lady Mary Ponsonby.

Orderly Marketing Of Canadian Wheat Crop Is Government Plan

Backs Western Farmers

Higher Reward For Services Necessary States Hon. J. F. Bryant

Toronto, Ont.—"The farmers of western Canada are not a bunch of 'Reds' although a few 'Reds' are found in their ranks," Hon. James F. Bryant, Minister of Public Works and acting Minister of Agriculture for Saskatchewan, told the directors' luncheon of the Canadian National Exhibition. He said they are trying to bring about better conditions in rural life.

"They have seen the dawn of a new day, and in any matter which affects agriculture the voice of the western farmer will be heard," declared the minister. The farmer who endeavors to raise on his own farm the means of livelihood for himself and his family, and does not seek to gain wealth, is a rule in a comfortable position during the present economic conditions.

"It is not production, but distribution, that is the chief difficulty. Falling prices have failed to check the constantly increasing supplies and there is a growing belief among farmers that something is radically wrong with rural life," said Mr. Bryant. "Agriculture must receive a higher reward for services rendered."

British Farmers Favor National Milk Pool

Overwhelming Majority Shown When Vote Was Taken

London, England.—British farmers have voted overwhelmingly in favor of a national dairy pool. The result of the poll showed 96.42 per cent. in favor and 3.58 per cent. opposed. A two-thirds majority was necessary.

With its national and regional pools the scheme will be one of the biggest undertakings in the United Kingdom. Farmers will sell their milk through the pools which will divide the profits among participants according to the amount of milk each delivers. The national board which will be in charge, will be responsible not only for marketing and supply contracts but will also have the task of utilizing surplus milk for cheese-making and the manufacture of dry milk on a large scale. The board assumes control October 1 for a trial period until the new year when the scheme itself becomes operative. The scheme applies to England and Wales.

Democracy On Trial As Never Before, Says Premier Bennett

Newmarket, Ont.—"Democracy is on trial as never before since it became a form of government," Prime Minister R. B. Bennett declared here recently in addressing the Liberal-Conservative summer school. The Premier rushed here from two speaking engagements in Toronto to address the students.

In recent years democracies have fallen in Italy, Germany, and Egypt," he said. "The substitution for the will of the people of the will of the dictator has come about," he remarked, "but we see that man has not been able to evolve a better system than democracy for the good of the country."

The Prime Minister was welcomed by thousands of students at the gates of Pickering College, where the school sessions are being held. J. Earl Lawson, Toronto member of parliament and chairman of the school, extended a formal welcome. Once within, however the school reasserted its prevailing informality.

The defects of democracy Mr. Bennett said are well known and it is realized what its dangers are and the steps that should be taken to overcome them.

Suppose you realize the counting of heads is resorted to to determine vital issues of a democracy, where counting heads would not be utilized for any other purpose. In agriculture in almost every activity in which man engages, merit is determined by scientific process. For government by democracy, he who can count the most heads in his favor is the man to whom the most merit goes.

"Do you ever think what that,

Ottawa, Ont.—That the policy of government intervention to ensure the orderly marketing of Canada's wheat crop will be carried out again this year has now been accepted as definite among observers at Ottawa.

Information obtainable in official circles has been such as to indicate that no other course of action would be consistent in view of the recent wheat agreement signed at London.

According to opinions held in the best informed quarters here the government's stand will be that if the recent world wheat agreement means anything to Canada it must mean support to the wheat market; that the selling of the Dominion's wheat crop must not be left to the mercy of haphazard speculation.

It is understood the government has the fullest confidence in John I. McFarland, its representative on the wheat selling agencies, and it will not be surprising if one or two assistants are named to act with Mr. McFarland in that capacity.

Was Former Member Of Mounted Police

Colonel Duffus Dies At His Home In Vancouver

Vancouver, B.C.—Private funeral services were held for Col. A. W. Duffus, for many years intimately associated with the Royal Canadian Mounted Police at Regina and Saskatoon, who died suddenly at his home in Vancouver. He retired a few years ago.

It was the wish of the family that no military display be made in connection with the rites and only relatives and close friends attended. Services were conducted by Venerable Archdeacon F. C. C. Heathcote and interment made in Ocean View Burial Park.

Major-General A. B. Perry, C.M.G., former commander of the famous force, in a tribute to Col. Duffus, said: "He was not only a most efficient but a very popular officer and his passing will be regretted by all his old comrades."

Shipping Price-Winning Hogs

Toronto, Ont.—The Ontario government bought seven carloads of prize winning hogs, highest types of bacon producers in the province, for shipment to the British market. It was the first purchase of the kind ever made by the provincial government. Total price paid for 280 animals was \$7,500.

A SCENE FROM THE WHEAT CONFERENCE

Our picture was taken after one of the hectic sessions of the World Wheat Conference in which delegates from thirty-four nations sought an opportunity for an international agreement on wheat production. The main figure in the group coming out of Canada House is that of Right Hon. Stanley Bruce, chief delegate from Australia, who played a big part in the proceedings, which concluded harmoniously.

WM. R. HOWSON, PROVINCIAL LIBERAL LEADER CALLS FOR COMPLETE RE-ORGANIZATION

Enunciates policy which will be put
into effect by Liberals after next
election — Increased efficiency
with elimination of waste
and establishment of
an active department
of labor and industry

Mr W. R. Howson, leader of the
Liberal Party in Alberta, speaking at
a well attended meeting at Calder, in
referring to the Provincial Liberal pro-
gram, stated that the Liberal govern-
ment after the next election would
completely re-organize every depart-
ment of the Government in order to
increase efficiency and to eliminate
the tremendous waste, duplication and
unnecessary expenditure which exists
at the present time.

He particularly stressed the neces-
sity for a new department of Labor
and Industry and assured his audience
that this could be done and at the
same time still greatly decrease the
costs of the administration. He said
that such a department was essential
to Labor in achieving its aims, while
at the same time the function of this
department would be to develop the
several industries of the province.

He said that the C.C.P. held out re-
bulous theories that could never be at-
tempted, whereas the Liberal party
assured the taxpayers of practical and
definite action. Both labor and indus-
try had been neglected in the province
and what was needed was the certain
support by the government of both
these interests. The provincial govern-
ment should have within its ranks
men who are definitely interested in
and connected with each and all of
the basic interests of agriculture,
mining, merchandising, lumbering and
fishing, as well as the labor forces
operating these. He definitely pledg-
ed the provincial Liberal party to es-
tablish this new department when
elected and said that this was no elec-
tion promise, but a statement of pol-
icy.

SWIFT CANADIAN CO. LIMITED

Edmonton's largest manufacturing
company is planning to celebrate its
25th anniversary in business here the
week of September 25th. In that time,
according to Mr. Gordon S. Robertson,
manager, the Swift Canadian Co.
Limited has paid out around \$136,000-
000 to persons within the Alberta
trading area. This money has gone
to producers of livestock for their
animals, to thousands of men and wo-
men who have, in that period, been on
the Swift payrolls, for taxes, main-
tenance and other purposes.

Here and There

Taken as a whole the British
West Indies as a market for Cana-
dian products ranked tenth last
July with \$550,000, with New-
foundland coming next.

Increasing prosperity in Cana-
da and the United States is seen
in the early arrival in the Do-
minion of United States Christmas
tree buyers. They are particularly
busy in the Maritimes where the
demand is especially heavy.

Edward C. Carter, of New York,
traveler and publicist, has been
chosen to fill the newly-created
post of secretary-general of the
Institute of Pacific Relations
which has just completed its fifth
biennial conference at the Banff
Springs Hotel.

Eleven happy boys took the
eleventh annual "On to Alaska"
tour this year under the leader-
ship of George E. Buchanan, of
Detroit. Their trip included a
stop at the Banff Springs Hotel
where the boys stayed until they
entrained for Lake Louise.

Traffic earnings of the Cana-
dian railways for July show an
aggregate gain of nearly a million
dollars as compared with July,
1932, the best showing in many
months on similar comparisons.
Gross earnings of the Canadian
Pacific account for \$472,000 of
the gain during the month.

"He got you that time," said
Mrs. Montague Norman to the gov-
ernor of the Bank of England,
when they landed recently at Que-
bec from Canadian Pacific liner,
Duchess of Atholl, on their way
to Bar Harbor, Maine. The pur-
pose of the visit is a mystery, not
even a holiday being admitted by
the distinguished visitor.

John Nelson, president of Ro-
tary International, sailed recently
by Empress of Britain on his way
to Lausanne where the second
European regional conference of
the world-wide organization was
held this month. He stated that
Rotary had 150,000 members in
300 clubs.

"If from the conferences,
speeches and exhibitions at the
World's Grain Exhibition at Re-
gina we can derive even one sug-
gestion of importance to agricul-
turalists, the show will be voted a
success," said E. S. McIlroy, man-
ager, United Grain Growers office
in Calgary, in a recent address at
the Palliser Hotel in that city.

WORLD HAPPENINGS
BRIEFLY TOLD

First silver to be blown out from Great Bear Lake was valued at approximately \$4,000. It was flown out to Edmonton by Pilot John Bythell.

Ocean-borne traffic at the five ports of the Kwantung Leased Territory in Manchuria in the first seven months of this year was greater than in the same period of 1931 and 1930.

The whole village of Capelan, a small Portuguese fishing community near Ponta Delgada, was enriched recently when 100 pounds of ambergris were found in the carcass of a whale which stranded on the beach.

Dr. Hugo Eckener has concluded an agreement with the Brazilian Government for all-year Zeppelin service between Europe and Brazil. Brazil agreed to erect suitable housing facilities for the airship.

William Cody Bradford, 60, a nephew of Colonel William F. (Buffalo Bill) Cody, shot himself to death at his home in Casper, Wyoming. He was believed to have been despondent because of ill health.

The U.S. Government is considering asking the next session of congress for authority to negotiate commercial treaties embodying reciprocal tariff concessions, particularly with Canada and Latin-America countries.

Hubert Scott-Paine will make a second and determined effort to wrest the Harnsworth speed-boat trophy from Gar Wood, American title-holder, in 1934. A definite statement to this effect came from the British pilot in Bermuda.

Kittling Boys' Band, from their world triumph at the Chicago World's Fair, was welcomed home to Vancouver by thousands of persons and massed bands gathered at the railway station. Later they were officially welcomed at the Canada Pacific exhibition.

International Highway
Practically Completed

Attractive Scenic Route From Peace River District To Big Hole

A new international route highway connecting Canada and the United States is practically completed and will be known chiefly under the name of the Sunshine Highway. This highway, the only international project of its size east of the Rocky Mountains, connects Alberta's extensive highway system with that of the States of Montana, Nevada and California, making an attractive scenic route along the eastern side of the Rockies from the Peace River District in Northern Alberta to San Diego, California, on the south, a distance of more than 2,500 miles.

Announcement of the completion of the new route was given at the Sunshine Trail Convention recently held in Lethbridge, Alberta. That stretch of the new highway running through Alberta, from the United States-Canadian border southwest of Lethbridge to the Peace River, a distance of 725 miles, has been completed for some time. Montana is now engaged in completing the last link of the highway in that State.

For the larger portion of the distance this highway is an all-weather road, being gravelled in Alberta to 80 miles north of the city of Edmonton, about 420 miles. The route through Montana, which is Highway No. 31 of that State, is an all-weather road the entire distance. From Salt Lake City north to Peace River is a distance of over 1,600 miles.

The new highway gives easy access to the Rocky Mountain resorts of Montana and Alberta by connecting all-weather roads.

Australia's New Currency

Water-Mark Shows Head of Prince of Wales

The head of the Prince of Wales, in profile, is one of the innovations introduced in the new currency notes shortly to be put into circulation in Australia. The prince's head will replace the Commonwealth coat-of-arms water-mark. When held up to the light the features of the head to the throne will be seen facing those of the King.

Another change is that the promise to pay in gold has been deleted.

Advance In Television

Berlin's big radio show registers marked advances in television. New devices increase picture transmission from the old limit of 90 lines to 180 lines on a 15 by 15 centimeter surface, with almost perfect results. In transmitting 25 pictures per second 1,000,000 points are flashed off. It is in this speed and closeness that give excellent reproductions.

Clock Made Many Trips

Timepiece Of Pacific Liner Now In Radio Room At Regina

A clock which made 262 trips across the Pacific Ocean to China on the old "Empress of Japan," and which for the past 11 years has been lying in an office in Vancouver now adorns the radio operating room of CCKC, Regina, Saskatchewan.

Some 12 years ago, Bert Hooper, engineer of CCKC, but then wireless operator on the staff of the Canadian Marconi Company, was placed on board the "Empress" by his company as operator in charge of the ship's wireless system.

Mr. Hooper had then been with the Marconi Company some six years and was aboard the "Empress" for nearly two years.

When the "Empress" was sold and dismantled records and some of the equipment was taken ashore and placed in the Vancouver office of the Marconi Company.

Some weeks ago Mr. Hooper visited the coast and called upon his old chief, L. S. Hawkins, superintendent of the Pacific Coast Division of the Canadian Marconi Company.

Before leaving he was presented with the timepiece which hung in the wireless operating room of the "Empress."

Modern Wireless Station

Erected On Site Where Marconi Made Earliest Experiments

Signor Guglielmo Marconi is "extremely gratified" to know a modern wireless station has been erected on Signal Hill, site of his earliest experiments in trans-Atlantic wireless telegraphy.

Following the opening of the new Signal Hill Station, the inventor of the wireless telegraph Premier P. C. Alderdice said as follows: "I recollect with keenest pleasure my associations with your country and the generous support given me by its government during my earliest tests with trans-Atlantic wireless communication, and an extremely gratified to know that on the very site where those tests were carried out, a modern station is now installed embodying latest developments."

Recipes For This Week

(By Betty Barclay)

RIPE GRAPE JAM

4½ cups (2½ lbs.) prepared fruit.

7 cups (3 lbs.) sugar.

½ bottle fruit pectin.

To prepare fruit, slip skins from about 3 pounds fully ripe grapes. Simmer pulp, covered, 5 minutes. Remove seeds by sieving. Chop or grind skins and add to pulp. Add ¼ cup water and if desired, grind rind of 1 orange. Stir until mixture boils. Simmer, covered, 30 minutes. (Wild grapes, Malagas and other tight-skinned grapes may be stemmed, crushed whole, simmered with ¼ cup water 30 minutes, sieved, and then measured. With light-skinned grapes add juice of 1 lemon to water. Use 4 cups prepared fruit.)

Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Pour quickly. Paraffin hot jam at once. Makes about 11 glasses (6 fluid ounces each).

FRUIT RAISIN SALAD

(Serves 6)

Lettuce.

6 oranges.

¼ cup seeded raisins.

Arrange shredded lettuce on individual salad plates. Peel and slice oranges and arrange in circles on lettuce. Fill center of circle with raisins which have been steamed until plump. Serve with Sweet French dressing or with orange juice mixed with equal parts of honey or jelly.

Real Globe-Trotter

Eighty-Year-Old Woman Making Fast Trip Around World

Mrs. Jane Lee of Kansas City, eighty-year-old woman with snow-white hair, has just stopped in Paris again on her annual trip around the world. She has been making this trip for forty years, for she says she doesn't like to stop in one place.

Mrs. Lee knows the Yukon, has sailed to the Antarctic Circle and this year is doing a thorough job of the Balkans.

A British report says that in the past 50 years 18,000 men have been killed in British colonial mines.

"This rope is for catching cows," Tenderfoot: "Yes, but what ball do you use?"

Indian Wants Gold Teeth

Joe Dillon, full-blooded Slavey Indian, is coming south of Fort Smith, N.W.T., for the first time in his life. He is bound for San Francisco on holiday after selling a big silver chain for \$35,000, and his first act will be to get a set of gold teeth for himself and his aquaw. Their teeth are all right, but what's the use of having \$35,000 if you can't let the world know about it? Joe said.

Some men boast that they can't be fooled twice in the same way, but there are lots of other ways.

CHAIR PROPRIETOR: "What's the meaning of this? Why aren't the chairs out?"

ATTENDANT: "Well, the bloke up 'ere paid twenty-four shillings for them all air, and he says the view's worth it."—The Humorist, London.

Labrador Huskies Ready

For Byrd Expedition

About Fifty Wolf-Dogs Have Been Carefully Selected

Labrador huskies will work hand in hand with aeroplanes during the next Byrd expedition to "Little America," starting from Boston, October 1.

The expedition will last two years, with the S.S. Pacific Fur (8,000 tons) and the barquentine "Bear of Oakland," as the supply ships. Two or three aeroplanes are to be taken along, to augment those used in the last expedition by the United States explorer, as well as something like 50 magnificent specimens of Labrador and Quebec husky, or wolf-dog.

Some 45 of these maulmates have been sent to Wonalancet, New Hampshire, which is where rear Admiral Byrd selected his first batch of dogs for the Antarctic. Arthur Walden, veteran dog racing man, makes his home in the New England city, and it was Walden's head-liner, Balby, who accompanied Byrd on all expeditions until the day when, getting old and feeble, he walked out into the icy cold, and was never seen again.

The canines were loaded at Quebec into a huge truck, each of them crated, and sent off to Wonalancet.

With plans for the expedition, which will be one of scientific research, under way for the last two years, or more, nothing is being left to chance, and the same careful selection was made of dogs as of members of the expedition.

According to plans, the expedition will get under way Oct. 1, after the S.S. Pacific Fur has been re-christened, and will steam out of Boston harbor, to make its way along the Panama Canal, through the Westway, and into the Pacific Ocean, then heading for New Zealand, which will be where they will leave civilization behind.

Geological and meteorological studies will be carried out, as well as the oceanographical research, which the expedition will also delve into the cosmic ray. They expect to return with priceless information.

Export Of Meats

Figures Show Export Went Over Million Marks In July

Canada's export of meats was again over the million dollar mark in July, the actual value being \$1,089,134 compared with \$741,712 in July, 1932. The chief item was bacon and hams, the total of which was 74,300 cwt., valued at \$854,627. The amount sent to the United Kingdom was 73,003 cwt. at \$827,428, out of a total meat export to Great Britain of \$942,384. A year ago the bacon and ham export to Great Britain was 48,795 cwt. at \$602,768. The figures were released today by the Dominion Bureau of Statistics.

A rapidly growing export is in canned meats. It has multiplied almost three times in the last 12 months. The July quantity was 113,612 pounds, valued at \$20,841, the amount to Great Britain being 108,898 pounds at \$19,393.

Reverence For Ancestors

Though Quong Lee, believed to be the world's first Chinese telephone subscriber, is long since dead, his name is listed in the New San Francisco telephone directory. It has appeared regularly for 55 years, and telephone company officials said they presumed Quong's sons and grandsons continue to have his name listed because of the Chinese reverence for ancestors.

Kidnappers are becoming active in the Irish Free State.

SUNDAY SCHOOL LESSON
SEPTEMBER 17

SOLOMON

Golden Text: "Enter into His gates with thanksgiving. And into His courts with praise."—Psalm 100:4.

Lesson: 1 Kings, Chapters 5-8.

Devotional Reading: Psalm 100.

Explanations and Comments

The Great Procession With The Ark

And The Tabernacle, Chapter 8:1-5.—It was during the Feast of Tabernacles, which began on the fifteenth of the seventh month and lasted seven days (Leviticus 23:34), that the elders of Israel and all the heads of the tribes brought up the ark of the covenant out of the city of David, which is Zion. "Both the House of Commons and the House of Lords were present, as we would put it, for the elders were the chosen representatives of the people, and the princes of the fathers' houses were the hereditary leaders. In addition, there was vast attendance of the rank and file."—B. C. Gillie. Two processions advanced from different directions.

One came from Gibeon and bore the sacred tabernacle with its goat-hair covering and boards of acacia wood, and all its holy vessels—the brazen altar, the golden candlesticks, the table of showbread, and the brazen altar. On Mount Zion this procession joined the other which bore the ark away from its temporary tent erected for it in Jerusalem by David. As the two processions proceeded to the temple, Solomon and a great congregation with him sacrificed a host of sheep and oxen. The road (which was the traditional place preserved by Josephus) was flooded with streams of blood. The air was darkened and scented with the clouds of incense, the songs and dances were unintermittent. Over the procession moved up the slope of the hill. It entered the court after court of the temple, reached the "Holy Place."—Stanley. By this lavish slaughter Solomon was honoring God in the best way known in those days. It was a primitive method of saying that king and people set no limits to the honor they would show Jehovah.

The Contents Of The Ark, Chapter 8:10.—There was nothing in the Ark but the two tables of stone. Hebrews 9:4 speaks also of a golden pot holding manna, and Aaron's rod that budded, to make its way along the Panama Canal, through the Westway, and into the Pacific Ocean, then heading for New Zealand, which will be where they will leave civilization behind.

My word," said Christ, "and My Father will love him, and we will come unto him and make our abode with him." The dwelling of the Spirit in our human temples depends upon our obedience to Christ's words.

Nature's Nitrogen Store

Agency Used By Nature For Maintaining Productivity Of The Soil

Humus, the vegetable matter in soil in the form of the semi-decomposed remains of past generations of plant life, is nature's storehouse for nitrogen. As the humus in a soil is increased, so is the nitrogen increased or decreased. Humus performs the useful purpose of so favourably affecting the physical condition of both clays and sands that it renders them suitable for the support of crops. It furnishes the material upon which the nitro-organisms of the soil feed, thus fostering a valuable agency in the preparation of plant food. And, again, it is the maintenance of soil productivity by constantly liberating in its decomposition certain small amounts of mineral matter in forms practically available for absorption by the roots of plants.—Dominion Chemist.

Unusual Things Do Happen

Stories Which Appear Ridiculous Often True

A visitor who says he always had an idea we made up our little stories about happenings around town—which we cross our heart we never do—changed his mind when he saw a well-dressed young man searching a Fifth Avenue gutter for discarded cigarettes. He had collected one or two when a trim young woman walked up to him, opened her purse, and offered him a whole package of cigarettes. He started to take one, hesitated, and said, "Thanks, but I don't smoke that kind." They both blushed and walked on.—The New Yorker.

New Treatment Effective

By use of methylene blue, medical science's newest form of treatment for poisoning physicians at Holywood hospital rescued from the brink of death Arthur Mortenson, 44, after he had consumed a drug so rapid in its action that doctors sometimes consider the chances 100,000 to 1 against surviving its effects.

She—"What do you mean by telling your boy friend that I was deaf and dumb?"

Other she—"I didn't say deaf."

Britain's Pilgrim
Of Peace

Sir Arthur Henderson Trying To Sell "Disarmament" To Europe

The traveller for peace recently made his second call on Rome, having arrived there from Paris.

He is Arthur Henderson, once a member of the British cabinet, now the pilgrim of peace, the man who is trying to "sell" disarmament to Europe.

He is a traveller without a bag of samples, without advertising, without anything tangible to show. Arthur Henderson is selling an idea, an ideal. He is trying to persuade the governments of Europe to invest in peace.

He tells tales from capital to capital. He sees and talks to statesmen and politicians. After Paris, Rome; then on to Berlin; with Prague, Budapest, Warsaw, Vienna and London ahead.

The firm Mr. Henderson represents is the League of Nations, Geneva. The assignment of their head traveller is on, is one of the most hopeless ever entrusted to an international statesman, although it is not entirely hopeless.

For eighteen months Mr. Henderson has been everybody in his line of business calls "Uncle Arthur," has been selling peace. When at the last general election he lost his seat at Burnley, Uncle Arthur disappeared into the comparative obscurity of the League Assembly at Geneva to become chairman of the disarmament conference.

For months and months Mr. Henderson labored to bring about international agreement on disarmament. He was patient, conciliatory, hard working.

Then it looked as though failure stared him in the face. The conference broke down.

Mr. Henderson issued a solemn warning to the nations.

"The delegations," he said, "realize that they must now choose between disarmament and rearmament, between constructive international collaboration and a course which leads to destruction, between a future of peace and order and a future of war and chaos for the world."

Before adjourning until October 25 the conference asked Mr. Henderson to try to negotiate agreements by direct conversations with the powers.

Uncle Arthur started out alone to sell disarmament to the nations. In some capitals of Europe he knew that he might receive a chilly welcome. But he was prepared to wait on many a door mat if he felt that he could save the conference from failure.

Backed By The Law

Any Request From Income Tax Department Cannot Be Ignored

Many a man ordered to make a return of his income has been advised of the government which supervises the collection of the income tax thinks it is a piece of nonsense; for him to be asked to do so when his total income falls short of the taxable figure.

Perhaps it is, but the department has the law on its side. This was proved a few days ago when a resident of an eastern community was assessed \$25 and costs by a police magistrate because he had failed to meet the wishes of the department.

The departmental agent in this case as long ago as July, 1932, made a declaration of his income. He failed to do so and after the lapse of over a year, he was hauled into court and fined. It mattered not, it appears, that his income for the year 1931 fell short of the taxable figure. To the police court he must go and pay the fine of \$25.

It may be considered the most unnecessary thing in the world, it may be regarded as stupidity, an idle waste of time or anything else, but when you receive a letter from the Income Tax Department asking you to make a declaration of your income, it is not always safe to ignore it. Proceedings such as those instituted may be the penalty for ignoring the summons.

Treated Throat Lighly

Threatened with the death penalty, 40 city councils of Scotland just laughed. When they announced their intention to fly the Scottish standard to commemorate the Battle of Bannockburn it became the duty of a high official to warn them that it was illegal. He asked the physicians at Holywood hospital rescued from the brink of death Arthur Mortenson, 44, after he had consumed a drug so rapid in its action that doctors sometimes consider the chances 100,000 to 1 against surviving its effects.

The Third Sunday in each year has been set by the National Council of Ramblers' Federation of Great Britain as a national Sunday for ramblers.

Occasional Wife

EDNA ROSS WEBSTER
Author of
"LIPSTICK GIRL"

SYNOPSIS

Camilla Hoyt, young and beautiful, fails in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On his first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich; or, at least, will not inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms.

(Now Go On With The Story.)

CHAPTER VIII.

When Camilla and Peter had gratified the weeks of their longing for love of each other with incoherent words and repeated kisses, Peter held her off and exclaimed: "To think how near I came to losing you! And I should have, if you had not told me the truth!"

"That was why I dared to tell you, because I had to. And at the same time, I was sure that when I did it would be the best. There is no explaining the way things happen, is there?"

Peter was silent for a minute, then turned aside from her suddenly and exclaimed, "But, Camilla, don't you see, dear—that you're not Miss Hoyt makes it all the more impossible for you to love me."

"What do you mean, Peter?" alarmed.

"Because I have no money, either. I can't take care of you—oh, for years—perhaps never. Mrs. Hoyt is right—you must find someone to whom she has plenty of money to take care of you."

"But didn't I just tell you that I was preparing to take care of myself?"

"Oh, that! For awhile—yes. But you must think of your future."

"That is just what I am thinking of—what my future would be without love."

"Surely, there is someone you could care about who has money and influence that will give you the happiness you deserve." He did not sound very convincing but he was trying to be generous.

"There is no one in the world who can make me happy, except you, Peter." She pressed her head close on his shoulder like a forlorn child seeking protection.

"Precious! Camilla, you make me wild. If only I could make you happy!"

"You can if you love me enough," softly.

"Love you! I love you too much! But I can't take care of you for ever so long, and perhaps I never could give you what you have had."

"Will you stop saying that, Peter?" she demanded severely. "I don't want the things I have had—ever. I want you—oh, Peter, darling, I love you so! Don't send me away from you." Her hands reached up and clasped around his neck. Her lips lifted to his. Peter took them, eagerly, lost to all practical reasoning.

They murmured together. "I won't, darling, I promise. We'll find a way."

Presently, it was Camilla who drew away suddenly and exclaimed, "Why, Peter, it is you who should marry me! You have a fortune, so you can be free to study and work without worrying about money. That would mean everything to you. I'm sorry I forgot your side of it, Peter dear, I'll go away and take care of myself and find someone else." Now it was Camilla who tried to be cheerful and convincing and generous.

Peter drew her close with an indignant laugh. "You precious little goose! What should I have to work for if I lost you? Having you would be my surest chance of success, Camilla. With you for my inspiration, the sky's the limit for me. We shall dream and work together, you and I. There are dreams in your eyes, that promise me a good, darling. How we shall live, together!"

"You are sweet!" she told him, timidly caressing his face.

"But I haven't told you all about me, dear. I have no family here, except some older brothers and sisters

who are married and involved in their own affairs. I lost my mother and dad when I was only a kid, and I lived with my oldest sister until I could take care of myself. I wasn't very old when I started on my own."

"Such a brave little fellow you must have been! Why should I be afraid that you can't take care of me some day, then?"

"Well, that's different. I get along somehow on very little. You are sure you don't mind that I came to America in the storage class and my mother wore a shawl over her head?"

"Why, Peter Anson! Why should I mind that? So did my mother come to America with a shawl over her head and suffer the bewilderment and fears of Ellis Island."

"What's the difference, anyway," she continued, "just a few generations? We all came from across the Atlantic, yet the first arrivals scorn the later ones. Because they beat us to it, I suppose. But as soon as the biggest high-bits have prospered with freedom and the democracy that they never practice, they go back where they came from. They go 'abroad' to exploit their wealth to the poor relatives they left behind, to buy continental culture, to absorb the genius of great foreign masters or revel in the historical grandeur of the old world. Even you believe that to complete your education, you must go abroad. Then why are you ashamed to have come from there?"

"You are marvelous!" Peter, declared solemnly.

"So are you! Do you know what you reminded me of the first time I saw you?"

"Aye tank aye go home?" he laughed.

Her finger tapped his cheek with gentle reproach. "Of course not. With you stop being ridiculous. You always make me think of Viking ships and brave adventurers in search of

conquest and new lands. You are like your beautiful, brave country. Your hair is like the gold of the sun that never sets in that long northern summer, your strength is like the rugged cliffs of the coastline, your eyes are like the sparkling blue ice of the stern winters."

He chuckled with joy at her delightful fancy. "Do I still remind you of an iceberg since I've kissed you?"

"No, I've changed my mind about your being an relation to ice. You must be the fire of the northern lights, the son of Aurora Borealis," she bantered.

"Just for that, I'll burn you up," he warned her, kissing her again. He held her away to scrutinize her beauty.

"Shall I tell you what you remind me of?"

"Please do! I hope it is something very nice."

"Everything nice—of sunny southern skies and brilliant flowers, intoxicating fragrance and sparkling blue waters, of glamorous tropical moonlight and music and gay laughter."

"I hope I always shall remind you of such lovely things, Peter."

"Happy, dearest?"

"So happy, I shall never be unhappy again."

"Or blue?"

"Nor blue!"

After awhile, he said, "But we haven't planned for the future at all. There is so much to decide. Everything is different now."

"Peter," she said severely, "if you let our love change your plans and ambitions the least bit, I shall be very unhappy."

"But I didn't have you in those

bilious?
Don't delay!
Relieve congested
foodways of
poisonous waste.
Take ENO'S
FRUIT SALT
and every morning.

plans. Now I have you and want to fit you into them from the beginning."

"Please tell me just what you had planned to do before you found me." Her tone was as matter-of-fact as if they were only new business partners.

"But that is the past—before I found you," Peter objected.

"Tell me, anyway," she insisted.

"Why, there was nothing very definite except that I was going to work very hard and sacrifice everything to succeed. I had planned to enter something in the National exhibit next fall to compete for the Paris scholarship. On the long chance that I won it, I hoped to make enough to pay my expenses over there by doing anything I could—just as I've worked my way through National. Perhaps a guide or interpreter. I know French, pretty well—and Swedish and Scandinavian."

"I have Spanish and French and some Italian," Camilla added. "We might start a foreign language school."

"Or build a tower of Babel."

"We'll let the children do that," she reminded him, slyly.

"Do I Still Remind You Of An Iceberg?"

conquest and new lands. You are like your beautiful, brave country. Your hair is like the gold of the sun that never sets in that long northern summer, your strength is like the rugged cliffs of the coastline, your eyes are like the sparkling blue ice of the stern winters."

He chuckled with joy at her delightful fancy. "Do I still remind you of an iceberg since I've kissed you?"

"No, I've changed my mind about your being an relation to ice. You must be the fire of the northern lights, the son of Aurora Borealis," she bantered.

"Just for that, I'll burn you up," he warned her, kissing her again. He held her away to scrutinize her beauty.

"Shall I tell you what you remind me of?"

"Please do! I hope it is something very nice."

"Everything nice—of sunny southern skies and brilliant flowers, intoxicating fragrance and sparkling blue waters, of glamorous tropical moonlight and music and gay laughter."

"I hope I always shall remind you of such lovely things, Peter."

"Happy, dearest?"

"So happy, I shall never be unhappy again."

"Or blue?"

"Nor blue!"

After awhile, he said, "But we haven't planned for the future at all. There is so much to decide. Everything is different now."

"Peter," she said severely, "if you let our love change your plans and ambitions the least bit, I shall be very unhappy."

"But I didn't have you in those

them, for awhile, just seeing each other when we can, then?"

"Not going to the Mastic and the Maddox. Oh, Peter, that was terrible. You must let me pay you back the money you spent that night."

"Don't say that, dear. If I always have as much pleasure from the money I spend as that gave, I'll get enough from life. Please don't mention it again."

"All right. But you must not spend your money on me again. We can walk and talk together in the park often, and have little picnics this summer when you are not too busy."

So they planned confidentially, as only lovers who know little of the caprices of life may dare; for to them the future always beckons along a straight shining road.

(To Be Continued.)

Cambridge Scientists

Return From Expedition

Bring New Species Of Animals and Reptiles From Jungle

Many animals, reptiles and insects hitherto unknown to man were discovered by three young Cambridge scientists who landed at Plymouth

from an expedition into the unexplored jungles of the British Cameroons.

The adventurers I. T. Sanderson, G. Russell and H. P. Seaton, members of the Percy Sladen expedition, have brought with them a collection of 7,000 specimens, in search of which they have penetrated into country hitherto untrod by white men.

The collection includes: Flying squirrels equipped with "parachutes" of varied colors by which they fly from tree to tree.

A giant water shrew belonging to a species thought to have vanished ages ago.

A five-foot male gorilla. One hundred and fifty specimens of mammals.

Thousands of rats, bats, frogs and spiders.

A frog that is covered in hair and another that has claws.

Mr. Sanderson stated that he had two gorillas, one of which died in captivity.

The natives, he said, are convinced that the gorilla is a "retrograde human being" with habits that are human, but they considered that the chimpanzee is definitely a monkey.

"In the Asaambo district," he added, "we discovered an uncharted mountain range, which appeared geologically to be of comparatively recent formation."

"Our most thrilling experience was when we were lost in thick virgin jungle. We were surrounded by impenetrable forest, and then one day we sensed rather than heard, the sound of native drumming, and by following for a day and a night we came to a native village and so found ourselves again."

Beautiful Indian Capital

Everything In Jaipur Is Built On Fairlyland Basis

The Maharajah of Jaipur, who has been in the limelight more than once of late, returns to it again by winning the Prince of Wales' Cup at Hurlingham with his polo team. His native Jaipur sounds like an odd beautiful dream for everything there seems to be built on a fairlyland basis. The houses in the capital are painted in every conceivable shade of pink and purple, delicately traced with patterns of other colors, and tiny green shutters are on every window. There are peacocks in the streets, and the royal stables near the palace are crowded with horses and elephants. A touch of realism is added by the Maharajah's private observatory, but even it is unusual, for it contains the world's largest sundial.

Making Six-Year Tour

English Chef Collecting Recipes From Every Country In World

A Salford chef, Harold Hogan, is engaged on the queerest world tour ever known, for he is journeying 35,000 miles in search of little-known recipes in order that he may add variety to Britain's culinary tastes.

Already he has visited Denmark, Germany, Ireland, Scotland, Norway and Sweden, and already his pockets are bulging with recipes which he has obtained in foreign lands.

After a short sojourn in Salford he is off to France, Italy, Spain, Turkey, South Africa, Australia, America and Canada, where he hopes to secure thousands of appetizing recipes.

His novel world search for recipes will take him six years—and at the end he should be the most knowledgeable chef in the world.

Norway will boost government taxes.

Canadian-made shaving brushes are on sale in Belgium.

Retirement Well Earned

Two Sisters Served As Missionaries For 35 Years

Coral stone churches on scattered South Sea islands, a school for Micronesian boys and girls, the Bible and other Christian literature and school textbooks translated into Kusaian—these are some of the results of the work of two American sisters who started out from Newark, N.J., 35 years ago and now have just been retired.

The sisters are the Misses Elizabeth and Jane Baldwin, and their retirement was voted by the American Board of Commissioners for Foreign Missions.

For 29 years the sisters were the only white persons on the small island, Kusaian, on which they lived. They nursed the islanders through sickness; remained with them through outbreaks of furious tropical storms, and helped them through succeeding famines.

After translating school books, with their own hands the sisters prepared them for printing. Books were laboriously turned out on an old hand press until, on their twenty-fifth anniversary in the islands, a machine press was sent from Boston.

Everything has been done of planned by the two women. Thus, when a cement reservoir and typhoon house was built, Miss Elizabeth supervised the erection herself.

Members of the First Presbyterian Church at Newark, they sailed to the island first under the Woman's Board of Missions, now united with the American Board. In all their years in the islands they never had accepted any compensation.

Only once have they visited America, in 1911. Miss Elizabeth, who was 39 when she left America, is now 74 and nearly blind. Miss Jane, who was only 25 when she sailed is now 60.

THE RHYMING OPTIMIST

By Aline Michaelis

HOW FRAIL IS BEAUTY

How frail a heart is beauty
To touch the heart-strings only
The swirl of dancing shadows,
The willows bending low,
The jade and emerald water,
The far-flung, breaking waves;
How frail a thing is beauty,
That yet a life can save!

O, beauty let me clasp you
And hold you close always.
Walk with me in the splendour
Of morning's golden haze;
Reveal your still reflection
Upon the sleeping lake
And greet me with the twilight
When starry hosts awake!

A gleam, a hint a promise
A sunset's fleeting gold;
How frail a thing is beauty
That yet a life can mold!

A Strange Illusion

Telescope Convinced People Man They Saw Was Not Flagpole Sitter

A flag-pole sitter in Montreal seemed impossible but the office staff of one of the upper storeys of the Aldred Building were sure that they saw a person seated on a stool atop a flag-pole on a nearby building.

For many minutes the amazed audience gazed intently at this new spectacle. Only after a powerful telescope was sent for did they discover their mistake. The telescope revealed a man sitting on a stool on the roof of a building beyond the one which supported the pole. Strangely enough from all sides optical illusion caused the man to appear to be seated on the flag-pole. He sat still for more than 30 minutes and this added to the deception.

Waterspot Chaser Ship

Huge Volume Of Water Follows Liner

A waterspot playing tag with an ocean liner was the adventure experienced by passengers on the "Duchess of Bedford" during a violent wind storm. The liner was on her way down the New York to New Orleans.

The giant spot, which measured 60 feet across the base and at times as much as 500 feet in height, chased the liner for almost five miles at a speed of approximately 17 miles per hour, passengers reported.

Accurate Summing Up

Motor speed law was thus summed up in a court of appeal in connection with a court case arising as the result of a motor car accident: "This court has said three times, and I want it to be generally known, that if you are going at such a rate that you cannot pull up within the limits of your vision, and an accident happens, you are in the wrong."

Old Fashioned "Cream Cooking" at the cost of milk!

That's what you get when you use St. Charles Milk. It is not only economical and convenient but it is double rich in cream and gives a delicious cream-in-cream flavor to every dish you use it for. See

Little Helps For This Week

"O the depth of the riches both of the wisdom and knowledge of God; how unsearchable are His judgments, and His ways past finding out."—Romans 11:33.

No star is ever lost we once have seen. We always may be what we might have been.

Since good, though only thought, has life and breath, God's life can always be redeemed.

And evil in its nature is decay. And any hour can blot it all away; The hopes that lost in some far distance seem may be the truer life, and this the dream.

—A. A. Procter.

St. Bernard has said: "Man if thou dost a noble and holy life, and unceasingly prayest to God for it, if thou continue constant in this thy desire, it will be granted to thee without fail. And if God has not given it to thee, then shall find it in Him in eternity; of this be assured." Therefore do not relinquish your desire though it be not fulfilled immediately, or though you may swerve from your aspirations or even forget them for a while. The love and aspiration which once existed live forever beyond God, and in Him ye shall find the fruit thereof; that is, to all eternity, it shall be better for you than if you had never felt them.—J. Tauler.

Train Accidents

Seven Passengers Killed On Canadian Roads Last Year

Last year there were seven passengers killed and 339 injured in train accidents, the Dominion Bureau of Statistics says in a report issued recently. This was an average of one killed for every 3,000,000 carried, and one injured for every 12,000.

Injuries to passengers ranged from scratches and bruises to more serious injuries. Two passengers were killed in collisions, two fell from trains, two were killed getting on or off trains, and one from other causes.

There were 37 employees killed in train accidents and 937 injured, says the report, a low record for the last 22 years. There were 94 persons killed at highway crossings, of which 78 were motorists, and of this number 30 were killed at protected crossings.

STIRRING BEANS BREITONNE

Two tablespoons butter; 1 medium onion; 1 tablespoon flour; 1 cup evaporated milk; 1/4 cup water; 2 cups cooked string beans, cut in one-inch lengths; salt; pepper; paprika.

Melt butter. Fry thinly-sliced onion until yellow, but not browned. Stir in flour. Add gradually evaporated milk and water. Stir until thickened. Add cooked string beans, cut in one-inch lengths and seasoning. (Serves six).

No Longer Interested

Two political candidates were discussing the coming local election. "What did the audience say when you told them you never paid a dollar for a vote?" queried one.

"A few cheered—but the majority seemed to lose interest at once."

The mastiff bat is so-called because its pendulous upper lip gives it the appearance of a mastiff dog.

Increased demand for coffee is boosting business in Salvador.

WEAK WOMEN

Take Lydia E. Pinkham's

Vegetable Compound

Have you ever felt that you were too weak to do anything... that you did not have the strength to do your work? Women who are weak and run-down should take a tonic such as Lydia E. Pinkham's Vegetable Compound. Headaches and backaches that are the result of a tired, run-down condition often yield to this marvelous medicine.

98 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today... and watch the results.

Local News

Mr. and Mrs. A. E. Graham were Lethbridge visitors over the week-end.

The ladies of the W.M.S. of the United Church were well pleased with the result of the tea and pantry sale held in the Club Room on Sept. 9.

Mr. G. G. Coote, M.P. was a local visitor last week.

Mrs. R. Holmes returned last week from the coast where she has been visiting for several weeks.

Two cars driven by A. M. Morrison and Dan Kolesik collided on Sunday on main street.
